

CRU VACQUEYRAS

Mas du Bouquet is located at the foot of the Dentelles de Montmirail in a former sunny, untamed garrigue. The estate has been in the same family for over 60 years. In 1947, Jean-Marie Manganelli, a founder member of the Cave de Vacqueyras, created Le Mas du Bouquet. Geoffrey and Loïs, the third generation of artisan winegrowers, have just taken over the estate from their father. A love for viticulture has been handed down from generation to generation, and this comes through in the quality of the wine. Its rich complexity and balance reflect the Manganelli's passion for their terroir.

Grape varieties

Syrah, Grenache & Mourvèdre

Terroir

This Vacqueyras's rich taste comes from clay soil.

Winemaking & Ageing Methods

Our cellarmaster tastes the grapes from each plot and makes a rigorous selection to ensure that your wine comes from the best fruit. Low yields give this Vacqueyras excellent concentration. The subtle combination of traditional winemaking methods and modern technology enables this wine to fully express its terroir.

Tasting notes

This wine's very aromatic bouquet is redolent of spices and blackcurrant. It is very long on the palate, with hints of black fruit, liquorice, and spices.

Sommelier's suggestions

Domaine Mas du Bouquet is ideal with roast milk-fed lamb with savory, or simply grilled rib of beef with sea-salt.

This wine is best decanted and served at room temperature. It will reach its peak in 5 to 7 years.

CRU VACQUEYRAS

Annual Production

7.000 cartons

Average age of the vines

35-50 years

Yield

25ha

Average yield

12hl/ha

Commitment

The Rhonéa artisan winegrowers have enshrined their commitment to protecting their region and enhancing its development by signing «Vignerons Développement Durable » Charter and by producing ethically-made fair trade wines that meet the needs of today's winegrowers without comprising those of future generations.

This commitment to sustainable development focuses on three main priorities: the environment, society, and the economy.

Here are a few examples of our actions: preserving the countryside, protecting our terroir, using sustainable agricultural methods, recycling waste, optimising packaging, contributing to the local economy, making long-term investments, etc.
